

WATER AND SEWER RATE INFORMATION

New Water Rates for Missouri American Water Customers Effective July 20, 2016

New Sewer Rates for Missouri American Customers Effective July 22, 2016

The Missouri Public Service Commission (MOPSC) recently issued a final order in the rate case filed by Missouri American Water on July 31, 2015. During the review process, the MOPSC conducted a thorough audit of Missouri American Water and allowed for customer input into the rate-making process. The last general rate increase was in April 2012.

Investing in Your Community

Our company's ongoing investments in water and sewer system improvements were the main reason for the request. From January 2012 to January 2016, Missouri American Water invested approximately \$442 million in water and sewer infrastructure statewide, while reducing operating expenses by \$7.1 million compared to 2010.

As your local water and sewer provider, we have a responsibility to continue to improve our service to customers by investing in needed infrastructure. Continual investments in plants, pumps and pipes allow us to reliably deliver clean, safe water to you and your family.

Consolidated Rates*

As part of this rate order, the MOPSC has formed three zones of water rates and two zones of sewer rates based on geography. These are listed below along with the general rate adjustment for each region. This consolidation allows for water and sewer system investments to be spread across a larger number of customers, minimizing the rate impact.
