MRC MIDWEST RECYCLING CENTER

We Provide Secure, Transparent, and Environmentally Friendly Electronics and Appliances Recycling Solutions.

MRC Recycling is a nationally certified, locally owned and operated company that has been in business since 1998. MRC is a specialist in electronics and appliances recycling with the goal of properly diverting as many tons of material from the landfill as possible by offering convenient solutions to the ongoing issues of identity theft and environmental liability.

Annual inspections are done by the Missouri Department of Natural Resources and R2 Solutions. Quarterly reports are made to the St. Louis- Jefferson Solid Waste Management District in regards to our procedures, documentation, and end markets for materials

Peace of Mind

MRC is R2 certified, registered with the EPA, and is level 4 certified by the Missouri Department of Natural Resources. These certifications mean:

- MRC is inspected by Missouri DNR, and is rigorously audited through R2 solutions as to how all electronic material is managed and processed. This includes a certified environmental management system, and a 1 million dollar pollution insurance policy.

- We can provide documentation from cradle to grave showing all material was responsibly handled and ended up where it should.

- MRC has a written closure plan on file with Missouri DNR, and financial assurance is in place to pay a certified third party to properly recycle all material in their possession in the unlikely event MRC should go bankrupt. This gives you peace of mind knowing you are already absolved of any potential liability, from materials handling to identity theft, even if the worst case scenario were to play out.

You're Protected

Our secure processing facility, data destruction methods, written processes, as well as state and national certifications ensure our clients are protected from all environmental and identity theft liability.

Security

MRC can provide your company with the level of security and documentation you need.

Our processing facility has a security system, which includes constant security camera surveillance. MRC maintains cradle to grave documentation for all material we handle. Responsible Recycling (R2) certification # C2012-02365

Documentation we can provide:

- Certificates of Proper Recycling, Data Destruction, and Transfer of Ownership
- Serialized list of items recycled and/or destroyed
- Video documenting the destruction of your material

Data Destruction Methods

Hard Drive Erasure Software that exceeds Department of Defense standards

Industrial Degausser for on-site data sanitation

Hydraulic Hole Punch for on-site media destruction

Hard Drive Shredder for those clients who require total destruction of their data

You can trust us to securely remove your company's proprietary information and assure your compliance with all privacy laws.

US Environmental Protection Agency ID # MOR000533174
State of Missouri Department of Natural Resources ID # 043500
Level 4 State Certification # RR0585
